Sikadur®-31 CF Normal (formerly known as Sikadur®-31 LP)

2-part thixotropic epoxy adhesive

Product Sikadur®-31 CF Normal is a solvent-free, moisture tolerant, thixotropic, structural two part adhesive and repair mortar, based on a combination of epoxy resins and **Description** special fillers, designed for use at temperatures between +10°C and +30°C" As a structural adhesive and mortar for : Concrete elements Hard natural stone Ceramics, fiber cement Mortar, Bricks, Masonry Steel, Iron, Aluminium Wood Polyester, Epoxy Glass As a repair mortar and adhesive: Corners and edges Holes and void filling Vertical and overhead use Joint filling and crack sealing: Joint and crack arris / edge repair Sikadur®-31 CF Normal has the following advantages: Characteristics / **Advantages** Easy to mix and apply Suitable for dry and damp concrete surfaces Very good adhesion to most construction materials High strength adhesive Thixotropic: non-sag in vertical and overhead applications Solvent free Hardens without shrinkage Different coloured components (for mixing control) No primer needed High initial and ultimate mechanical strength Good abrasion resistance

Impermeable to liquids and water vapour

Good chemical resistance

Test							
Approval / Standards	Testing according to ASTM, C881M-02, Type I, Grade 3, Class B+C						
	Testing according to EN 1504-4.						
Product Data							
Form							
Appearance / Colours	Part A: white						
	Part B: dark grey						
Packaging	Parts A+B mixed: concrete grey						
Packaging	1.2 kg (A+B) pre-batched unit						
	5 kg (A+B) pre-batched unit						
Storage							
Storage Conditions /	24 months from date of production if stored properly in original, unopened and						
Shelf-Life	undamaged sealed packaging, in dry conditions at temperatures between +5°C and +30°C.						
Technical Data							
Chemical Base	Epoxy resin						
Density	1.90 + 0.1 kg/l (part A) (at +23°C)						
	1.90 + 0.1 kg/l (part B) (at +23°C) 1.90 + 0.1 kg/l (part A+B mixed) (at +23°C) (evacuated)						
Sag Flow	On vertical surfaces it is non-sag up to 15 mm thickness (according to EN 179)						
_ayer Thickness	30 mm max						
	When using multiple units, one after the other. Do not mix the following unit until the						
	previous one has been used in order to avoid a reduction in handling time						
Change of Volume	Shrinkage: Hardens without shrinkage						
Thermal Expansion	Coefficient W:						
Coefficient	59 x 10 ⁻⁶ per °C (Temp. range +23°C - +60°C) (according to EN 177						
Thermal Stability	Heat Deflection Temperature (HDT):						
	$HDT = +49^{\circ}C$ (7 da		(according to ISO 75 (thickness 10 mm				
				`

Elongation at Break	0.4 ± 0.1% (7 days at +23°C) (according to						
Application Details							
Consumption / Dosage	The consumption of Sikadur $^{\circ}$ -31 CF Normal is \sim 1.9 kg/m 2 per mm of thickness						
Substrate Quality	Mortar and concrete must be older than 28 days (dependent on environment and strength).						
	Verify the substrate strength (concrete, masonry, natural stone).						
	The substrate surface (all types) must be clean, dry and free from contaminants such as dirt, oil, grease, existing surface treatments and coatings etc.						
	Steel substrates must be de-rusted similar to SA 2.5.						
	The substrate must be sound and all loose particles must be removed.						
Substrate Preparation	Concrete, mortar, stone, bricks:						
	Substrates must be sound, dry, clean and free from laitance, ice, standing water, grease, oils, old surface treatments or coatings and loosely adhering particles to achieve a laitance and contaminant free, open textured surface.						
	Steel:						
	Must be cleaned and prepared thoroughly to an acceptable quality i.e. by blastcleaning and vacuum. Avoid dew point conditions.						
	Other surfaces (polyester, epoxy, glass, ceramic):						
	On these substrates pre-apply Sikafloor®-156 (primer) and then, "wet on wet" apply Sikadur®-31 CF Normal.						
Application Conditions / Limitations							
Substrate Temperature	+10°C min. / +30°C max.						
Ambient Temperature	+10°C min. / +30°C max.						
Material Temperature	Sikadur®-31 CF Normal must be applied at temperatures between +10°C and +30°C						
	onadar or or normal must be applied at temperatures between +10 o and +30 o						

3

Substrate Humidity	When applied to mat	When applied to mat moisture concrete, brush the adhesive well into substrate.								
Dew Point	Beware of condensat	Beware of condensation! Ambient temperature during application must be at least 3°C above dew point								
	Ambient temperature									
Application Instructions										
Mixing	Part A : part B = 2 : 1 by weight or volume									
Mixing Time		Mix p spind rpm) consis while conta speed	Pre-batched units Mix parts A+B together for at least 3 minutes with a mixing spindle attached to a slow speed electric drill (max. 600 rpm) until the material becomes smooth in consistency and a uniform grey colour. Avoid aeration while mixing. Then, pour the whole mix into a clean container and stir again for approx. 1 more minute at low speed to keep air entrapment at a minimum. Mix only that quantity which can be used within its potlife							
Application Method / Tools	When using a thin layer adhesive, apply the mixed adhesive to the prepared surface with a spatula, trowel, notched trowel, (or with hands protected by gloves).									
	When applying as a i	When applying as a repair mortar use some formwork.								
	When using for bonding metal profiles onto vertical surfaces, support and press uniformly using props for at least 12 hours, depending on the thickness applied (not more than 5 mm) and the room temperature.									
	Once hardened check the adhesion by tapping with a hammer									
Cleaning of Tools	Clean all tools and application equipment with Sika® Colma Cleaner immediately after use. Hardener / cured material can only be mechanically removed.									
Potlife	Potlife (200 g)									
	+10°C		+23°C		+30°C					
	~ 145 minute	s	~ 55 minutes		~ 35 minutes					
	The potlife begins when the resin and hardener are mixed. It is shorter at high temperatures and longer at low temperatures. The greater the quantity mixed, the shorter the potlife. To obtain longer workability at high temperatures, the mixed adhesive may be divided into portions. Another method is to chill parts A+B before mixing them (not below +5°C).									
Curing Details										
Applied Product ready										
for use	Temperature	Foot	traffic	Light traffic		Full cure				
	+10°C	~ 48 hours		~ 6 days		~ 14 days				
	+20°C	~ 30 hours		~ 4 days		~ 10 days				
	+30°C	~ 20 hours		~ 3 days		~ 7 days				
		Note: Times are approximate and will be affected by changing ambient conditions. For traffic with solid / hard wheeled lift trucks allow 3 weeks curing time.								
Cleaning / Maintenance										

To maintain the appearance of the floor after application, Sikadur®-31 CF Normal must have all spillages removed immediately and must be regularly cleaned using rotary brush, mechanical scrubbers, scrubber dryer, high pressure washer, wash and vacuum techniques etc., using suitable detergents and waxes. Methods

Sikadur®-31 CF Normal

Value Base

All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

Health and Safety Information

For information and advice on the safe handling, storage and disposal of chemical products, users shall refer to the most recent Material Safety Data Sheet containing physical, ecological, toxicological and other safety-related data.

Legal Notes

The information, and, in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
